

Installing iStation

If you are using a personal device that you own, you can install and use iStation. Here are directions for installing iStation on your personal devices.

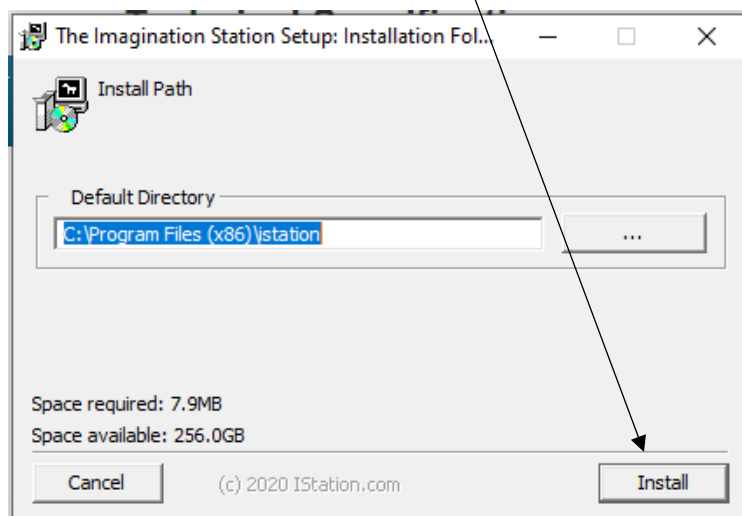

1. Go to [istation.com](https://www.istation.com)
2. Click on the button called "Download & Technical Info"

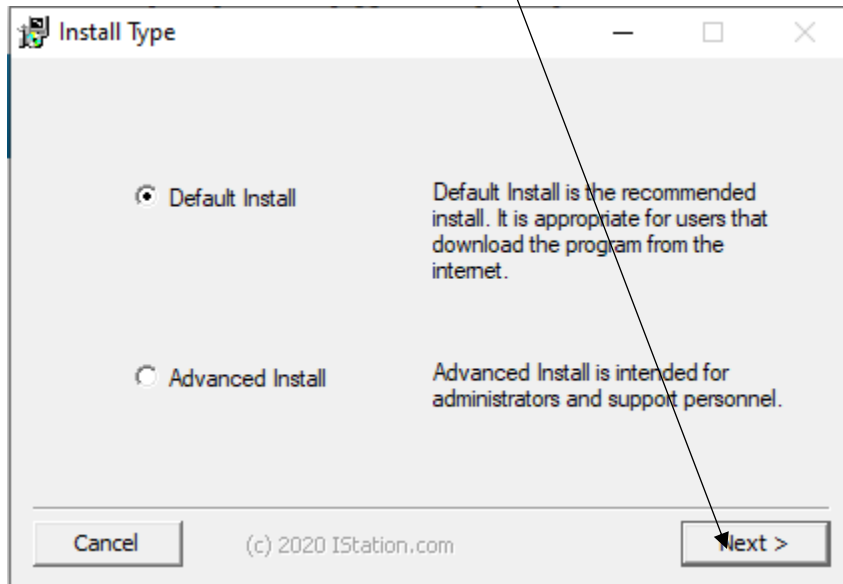

3. Scroll down and download the version of iStation for your device. For example, if you are on a Windows computer, you select “iStation for Windows.”

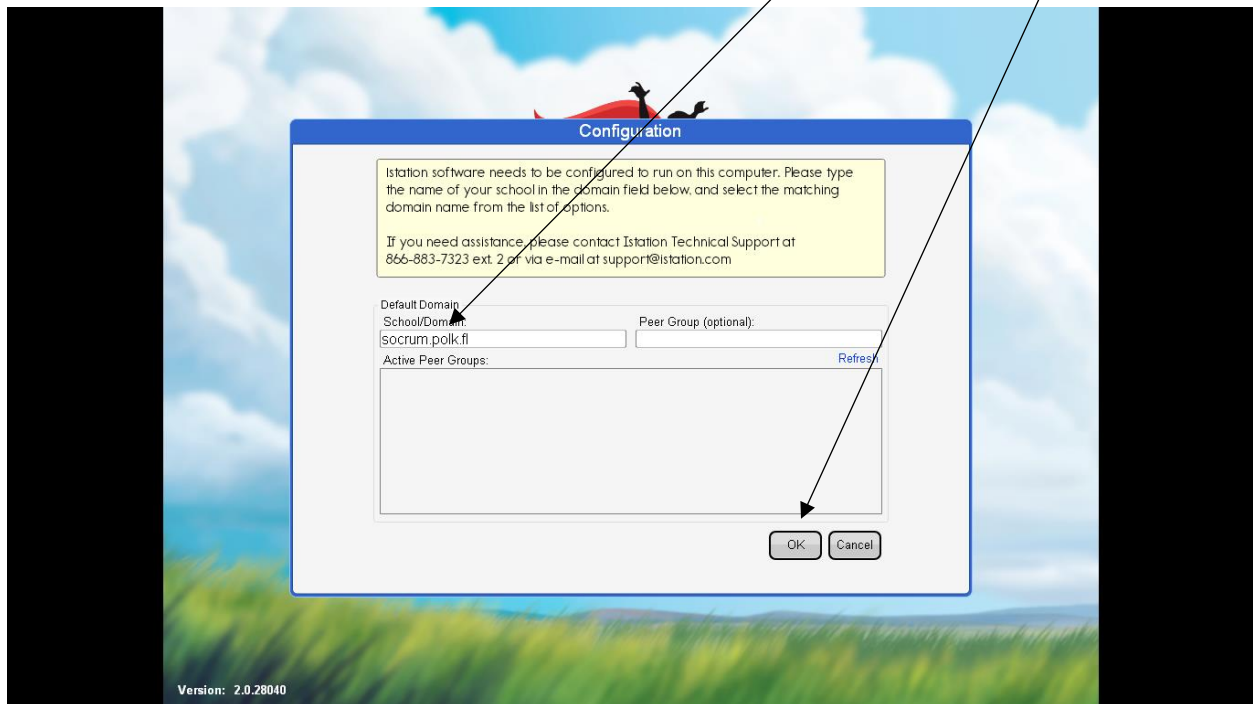

4. After it finishes downloading, double click on the downloaded file.
5. On the next window, select “Install.”

6. Leave it as “Default Install” and click “Next.”

7. When it is finished installing, there will be an iStation shortcut on your desktop. Open this shortcut and it will ask for your school domain. Type in socrum.polk.fl and click OK.

8. iStation will open to a log in screen. Click “Exit” and after it closes, you can delete the shortcut on your desktop. That shortcut **WILL NOT** work. You will now access iStation through Classlink.
